Details

A \$6.5 million renovation of 24,000 square feet into a state of the art emergency room department

A. Martini & Co. renovated 24,000 square feet at Excelsa Health Latrobe Hospital for its new Emergency Department. The project includes a waiting room, 27 examination rooms and three triage stations and has the capability of expanding to 50 beds in case of a disaster.

“This project was extremely complicated since it was built in the middle of a hospital that was open during construction. A. Martini & Co. coordinated with hospital administration, doctors and nurses to minimize disruptions. They did a great job.”
