
la Strada Restaurant

Owner

Todd Frischling

Architect of Record

The Design Alliance Architects

Details

A \$2 million, 10,800 square foot renovation for an upscale restaurant in a downtown office building. Project included the addition of a mezzanine, display kitchen, and sub-level prep kitchen.

“Even though there was a design prior to construction of this project, many issues involving the mechanical systems and the mezzanine had to be solved in the field. A. Martini & Co. did a great job meeting this need and constructing a great space. From the job superintendent to the principals, they all cared about making this the best possible project.”

Dan Delisio, AIA

Principal

The Design Alliance Architects

This project presented enormous challenges regarding site, schedule, and construction. In just 4-1/2 months, A. Martini & Co. constructed this 10,800 square foot restaurant - including a display kitchen, a sub-level prep kitchen, custom-crafted elements, and the addition of a new mezzanine to house mechanical equipment - without any additional staging area.
